

CytoFLEX ^{NEW} LX series Roadshow

Dear Cytometry-Community,

The CytoFLEX Platform is a revolutionary system presenting optimal excitation and emission, minimizing light loss and maximizing sensitivity. This means that you can easily detect dim population in your sample. And all with an easy to use and powerful analysis software interface. We are excited to present with the brand new CytoFLEX LX another expansion bringing five and six laser options to the CytoFLEX platform. In the today event we are demonstrating the unique performance of the CytoFLEX LX unit 6 laser 21 colors.

Too good to be true....? Check it out yourself by attaining the CytoFLEX Series Roadshow event in Valencia

We hope to see you on our CytoFLEX Road Show !
